Re: CC Docket No. 80-286

Dear Ms. Roman-Salas:

On July 10, 1998, John Schrottenboer and Porter Childers, representing the United States Telephone Association (USTA), met with Scott Potter of the Federal-State Joint Board staff to discuss USTA's position regarding issues in the Federal-State Joint Board on Separations Reform proceeding. The attached material was the basis for the presentation and discussion.

The discussion was consistent with USTA's Comments and Reply Comments on file in this proceeding.

In accordance with Section 1.1206(b)(2) of the Commission's rules, two copies of this notice are being submitted to your office today. Please include it in the public record of this proceeding.

Respectfully submitted,

A handwritten signature in cursive script that reads "Porter Childers, esq.".

USTA Separations Reform Proposal

CC Docket 80-286

**Jurisdictional Separations Reform and
Referral to the Federal-State Joint Board**

Legal Basis for Jurisdictional Separations

- There is currently a legal requirement to define jurisdictional responsibilities for costs and expenses.
- Each jurisdiction must then allow charges at a level designed to fairly compensate LECs for services under its authority.
- Jurisdictional separation of costs is necessary so long as local exchange carriers remain subject to federal and state regulations — including price cap regulation.
- The Telecom Act of 1996 did not change 47 U.S.C. § 221(c).

USTA's Separations Freeze Proposal

Two-Tiered Approach:

Price Cap Carriers:

- Immediate freeze of allocation factors and categorization relationships as of 12/31/97

Rate of Return Carriers:

- Immediate freeze of allocation factors based on an average of 1994, 1995, and 1996 data
- Continue current categorization process

Meets Criteria Recommended by FCC Commenters Evaluating the Existing Separations Process

- Competitive neutrality
- Administrative simplicity
- Regulatory streamlining
- Maintains principles of cost causation
- Avoids jurisdictional cost shift
- Maintains jurisdictional separations

Advantages of USTA's Separations Freeze Proposal

- Promotes competitive neutrality and administrative simplicity
- Significant streamlining of the regulatory process
- Continues to allow for the processing of cost data through the FCC Parts 32, 64, 36, and 69 rules
- Easily auditable
- Continues to provide required data for Federal and State Monitoring Reports
- Continues to provide required data for FCC's ARMS 43-04 Report

If the USTA Proposal Is Adopted, the Issues Raised in the Notice on These Subjects Are Resolved:

- Marketing expenses
- Spare facilities
- Customer service expenses
- White Pages

Other Issues

- Universal service
- Study areas
- Audits
